

INSTITUTE TOLLWAY

TOLLWAY CENTRAL INSTITUTE FOR RESEARCH AND ENGINEERING:

MODERN SOLUTIONS FOR TRANSPORT INFRASTRUCTURE

TOLLWAY INSTITUTE

TOLLWAY CENTRAL INSTITUTE FOR RESEARCH AND ENGINEERING (hereinafter referred to as the 'Tollway Institute') is a part of Tollway Group.

The Institute specializes in scientific and research as well as planning and surveying activities in the field of the transport infrastructure.

Membership in professional associations

The Tollway Institute has a permit to design works influencing safety of capital construction objects.

Self-Regulatory Organization 'Urban Planning and Design Association'

'Association of Surveyors 'GeoIndustry''

"Association of general contractors in construction"

Main activity directions

Pre-design work

Selection of the object location

- Analysis of the current transport, road and social and economical situation in the planned object fixation area
- Estimation of the planned object placement zone: need for land lots, analysis of the existing engineering communications
- Engineering surveys

Development of the project concept and its feasibility study (FS)

- Transport models development
 - Traffic forecasts
 - Determination of optimal tariffs
 - Forecast of income from fares collection
- Development of user charge system (UCS) concepts:
 - Determination of necessary equipment, its configurations and placement
- Estimation of objects configurations
- Estimation of capital and operation expenditures
- FS development

Design work

- Development of the planning project and the area demarcation project
- Preparation of design, cost estimate and work documentation
- Author's supervision
- Technical supervision

Research work

The Institute carries out research activities in the following directions:

- Development of the methodology for estimation of investment projects attractiveness
- Traffic modeling and forecast
- Study of national and foreign experience of paid transport infrastructure development
- Development of the methodology for transport relations analysis in cities and industrial agglomerations

Projects

The Institute is the general design contractor and advisory engineer for the projects of Tollway Group.

PROJECTS

Overpass over a level crossing at Akulovo settlement (Naro-Fominskiy urban district, Moscow Region)

Specification

- Length - about 1,7 km
- Number of lanes - 2

Customer:

Akulovskaya Tollway Ltd

Overpass over a level crossing at Savvinskaya Sloboda (Odintsovskiy urban district, Moscow Region)

Specification

- Length - about 1,2 km
- Number of lanes - 2

Customer:

Odintsovskaya Tollway Ltd

Road with a bridge across the Nara river and an overpass in Naro-Fominsk (Naro-Fominskiy urban district, Moscow Region)

Specification

- Length - 2,6 km
- Number of lanes - 2
- Project includes creation of a bridge across the Nara river and an overpass

Customer:

Naro-Fominsk Tollway Ltd

Works performed by the Institute:

- Pre-design work
- Complex transport study
- Area Planning Design
- Design estimates
- Project design works
- Designer Supervisor Report

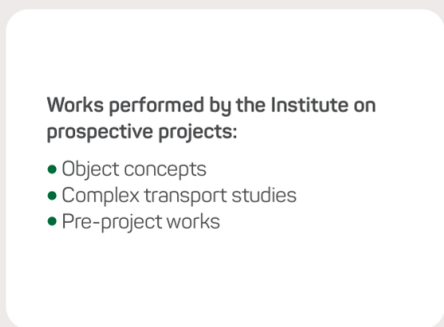

Overpass over a level crossing in the village of Novosidorikha (Shatura urban district, Moscow Region)

Specification

- Length - about 1,6 km
- Number of lanes - 2

Customer:

Shaturskaya Tollway Ltd

Works performed by the Institute on prospective projects:

- Object concepts
- Complex transport studies
- Pre-project works

Overpass over a level crossing at Malino working settlement (Stupino urban district, Moscow Region)

Specification

- Length - about 1,6 km
- Number of lanes - 2

Customer:

Stupinskaya Tollway Ltd

Overpasses over a level crossing in Saint-Petersburg, Central Federal District and Northwestern Federal District

Overpass over a level crossing near Zheltikovo platform (Sergiev Posad urban district, Moscow Region)

Specification

- Length - about 2 km
- Number of lanes - 2

Customer:

Sergievo-Posadskaya Tollway Ltd

ABOUT THE GROUP

Tollway Group is a group of companies that works for the development of the transport infrastructure and the improvement of the transport industry in the cities and regions of Russia, based on the principles of Public-Private Partnership (PPP)

The key target of the Group is the social and economic development of the country through increasing the mobility and the quality of life of its population.

Tollway Group includes specialized companies that altogether perform the operational activities of the Group

The Head Company of Tollway Group selects investment projects and provides general management for the selected ones. The organization controls and coordinates the work of the whole Group.

Tollway Central Institute for Research and Engineering (Tollway Institute) (hereinafter referred to as the "Institute") specializes in scientific and research as well as planning and surveying activities in the field of the transport infrastructure.

Tollway Management Company manages business activities of the Group.

Regional companies are directly in charge of the implementation of the Group's projects, being the Customer for the construction projects and may provide an services for the management of the created facilities.

EXPERIENCE OF COOPERATION WITH GOVERNMENT AUTHORITIES

Moscow Region Government

- MINISTRY OF INVESTMENT AND INNOVATION
- MINISTRY OF TRANSPORT AND ROAD INDUSTRY
- MAIN ADMINISTRATION OF ARCHITECTURE AND URBAN PLANNING

St Petersburg Government

- INVESTMENT COMMITTEE
- URBAN PLANNING AND ARCHITECTURE COMMITTEE
- TRANSPORT INFRASTRUCTURE DEVELOPMENT COMMITTEE

Naro-Fominsk Urban District Administration of Moscow Region

- URBAN PLANNING COMMITTEE
- HOUSING AND COMMUNAL SERVICES AND ROAD ACTIVITY COMMITTEE

Leningrad Region Government

- ECONOMIC DEVELOPMENT AND INVESTMENT ACTIVITY COMMITTEE
- ROAD ACTIVITY COMMITTEE

AWARDS

Investment Project in Naro-Fominsk (Road with a bridge across the Nara river and an overpass in Naro-Fominsk) won in the "Entrepreneur of the year, Moscow region – 2017" nomination at the "Territory for life" award according to Business Dialog Media publishing and communications group.

Investment Project in Naro-Fominsk (Road with a bridge across the Nara river and an overpass in Naro-Fominsk) won in the "Private Offer" nomination at the national award in the sphere of infrastructure ROSINFRA-2016".

Investment Projects in Akulovo and Savvinskaya Sloboda won in the "Private Offer" nomination at the national award in the sphere of infrastructure "ROSINFRA-2017"

Tollway Management Company became the winner in «Infrastructure and Road Construction» nomination of the «Russian Business Guide. People of the Year – 2019» Award.

Investment Project of construction of the automobile overpass over the railway tracks in the village of Akulovo won in the First professional rating of infrastructure projects InfraClub Awards.
